KUONI – ATLAS REPORTING EXPERIENCE

Kuoni – Process Prior to Atlas

- Reporting and Analytics process:
 - Standard Financial reporting and bespoke development for static reports
- Time spent on manual report creating:
 - Repetitive manual work
 - Periodic printing and manual distributing reports

Kuoni – Process After Atlas

- Changes in Kuoni processes post Atlas implementation:
 - Free format formula based reporting
 - Secure customised Excel reports inheriting the core AX Finance security settings protecting unauthorised data extraction from users
 - Specific report per cost center (Marketing, IT, ...), filter all transaction per cost center and link with the cost center budget against it
- Enabling report generation from different KUONI Finance entities within AX in combination with data pulled in from internal travel booking systems
- Change for the user
 - Link to filters within Excel gives complete flexibility to the report
 - Users to drill down on balances and customise without having to look into different systems

Atlas Benefits

- Ease of use, reduced need for specific AX or IT knowledge
- No additional software or bespoke code programming needed
- Automation in timely reporting based on single source of AX live and real time data
- Savings through optimisation
- Insights into the organisation - Trustful information and proactive reporting and simulations
